

WNBA Average Game Analysis

Presented to you by:
Houston Analytics, LLC

Meet The Team

Tiffany Houston, Data Scientist

Lead Data Scientist at
Houston Analytics, LLC. and
basketball enthusiast.

Overview

- Problem Statement
- Brief League Overview
- Methodology
- EDA & Modeling
- Findings
- Future Uses
- Q&A

Problem Statement:

**What's the number of games we predict
a player to play in the upcoming three
seasons?**

League Differences

Year Founded

- WNBA 1996 | NBA 1946

Average Careers

- WNBA career length ~3.5 years | NBA avg ~4.5

Teams / Rosters

- 12 WNBA teams | 30 NBA teams
- 12 players per team | 15 players per team

Play Time

- 10 minute WNBA quarter length | NBA plays 12 minutes
- 24 second shot clock (same for both)

Total Games

- 36 game season | NBA plays 82 games

Methodology

Linear Regression

- Ridge
- LASSO

Random Forest

- With and without Gridsearch

EDA & Modeling

- Pairplot and distribution plots didn't provide clear findings
- Scatter plots showed better relationship but on features with already assumed with high correlation

```
#compare variables that could potentially impact my Y  
sns.pairplot(df, x_vars=['TS%', '3PAr'], y_vars='NUM GAMES',
```

```
sns.pairplot(df, x_vars=['MP', 'PER'], y_vars='NUM GAMES', ki
```

Models and R2 Scores

Linear Regression Models

Random Forest Models

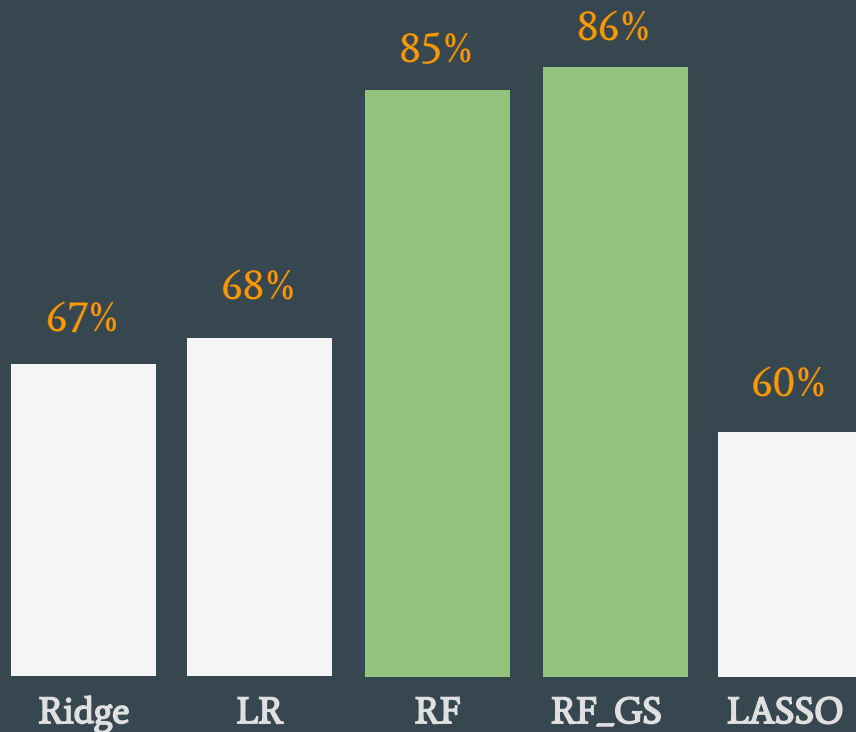

Linear Regression

- Poor scores all around
- No improvement with added metrics (Ridge/LASSO)
- Calculated coefficient and intercepts values

Random Forest

- Considerably better scores!
- Marginally better with added metrics

Linear Regression Findings

Feature Name = Coefficient Value(coef)

***Intercept = ~17**

Relationship to Number of Games =
Intercept + Coefficient value

DWS = 2.157 e+00

WS_40 = 3.992 e+01

WS = -2.714 e+00

PER = -3.994 e-01

Random Forest Train and Test Scores

Random Forest

Random Forest with Gridsearch

Findings

- Minutes Played per game and Defensive Win Shares were biggest contributors
- Defense Win Share with highest coefficient value
- Average of ~51 games for 3 years

Future Uses

- Use when negotiating future contracts for players
- Highlight areas of improvement/excellence on the court
- Encourage our players that defense wins the game!
